

## Technical Bulletins

### TECHNICAL BULLETIN #6

#### Karnak #505 Elasto Brite-M

---

The American Society for Testing and Materials (ASTM) has established a specification for acrylic roof coatings titled, "**Standard Specification for Liquid Applied Acrylic Coating Used in Roofing**", ASTM D-6083. This specification applies to high performance roof coatings based on 100 percent acrylic technology.

Karnak's #505 Elasto Brite-M system is based on 100% acrylic technology, so, it will comply with ASTM D-6083.

You can use the aforementioned ASTM number as a sales point when promoting the #505 System.

**Note:** If there are any questions, please contact Karnak's Technical Service Department : 1-800-526-4236, or Fax requests to: 908-388-9422.
